

HYBORIAN NAMES

With these random tables, you can create a very unique name for your sword & sorcery characters. These are inspired by names used in the Hyborian realm. Choose one of three regions in which you want to base your character name...*Aquilonian*, *Cimmerian*, or *Stygian*. You will roll the *last* part of the name first, and then you will roll the *first* part of the name. Combine them into a single name and you will have your character name. Any italicized names in the “**Last**” table means that you will need to reroll on the “**First**” table if the results are instructing you to roll on the “**Single**” table. If you end up rolling a vowel on the “**Single**” table, you must then roll on the “**Letter**” table and add that character after the vowel. Below are some examples of male *Aquilonian* names that are rolled up. Each of the different rolling scenarios is demonstrated.

I rolled a “4” on the “Last” table...
 I also rolled a “6” on the “First” table...
 I then take “First” + “Last” to get my name...
Alc + as = “Alcas”

I rolled a “65” on the “Last” table...
 I also rolled an “87” on the “First” table...
 I then take “First” + “Last” to get my name...
Tiber + ulus = “Tiberulus”

I rolled a “1” on the “Last” table...
 I rolled a “97” on the “First” table...
 Since the “Last” roll produced an italicized character, I have to reroll on the “First” table...
 I roll again and get a “72” on the “First” table...
 I then take “First” + “Last” to get my name...
Pallant + a = Pallanta

I rolled a “24” on the “Last” table...
 I rolled a “95” on the “First” table, which instructs me to roll on the “Single A” table...
 I rolled a “9” on the “Single A” table...
 I then take “Single A” + “Last” to get my name...
K + eus = Keus

I rolled a “49” on the “Last” table...
 I rolled a “100” on the “First” table, which instructs me to roll on the “Single B” table...
 I rolled a “2” on the “Single B” table, which is a vowel so I have to roll on the “Letter” table below...
 I rolled a “6” on the “Letter” table...
 I then take “Single B” + “Letter” + “Last” to get my name...
A + g + elio = Agelio

NOTE: Aquilonian males have an abundance of “First” names to draw from. This means there is an Aquilonian Male - First Name table that you would roll against to determine which of the two “First” name tables (A or B) you will roll against. The examples above ignore this fact for simple demonstration as all other name categories do not have this setup.

2d10	Letter	2d10	Letter	2d10	Letter	2d10	Letter	2d10	Letter
