This is a character sheet created by Wizardawn Entertainment, for use with the Tunnels & Trolls™ 7th edition role-playing game. It contains all of the information you would need to play a character in the game. There is a separate spell sheet for those spell casting characters, which allows them to record all they need for their spells without looking it up in the book during play. There are boxes next to abilities so you can check which ones are your character's level attributes. There are fields next to the abilities to indicate a value your ability may be enhanced due to magic items or spells. There are also fields next to your weapon adds to show your combat adds. There is enough space to record all of your character's inventory and up to 12 different talents. This character sheet is used for the world of Magestykc™, but you may find it useful for your games as well.
